Anderson Homes building on success

Daniel Rowley-Anderson founded the Tauranga based business Anderson Homes BOP Limited in 2015. He has 12 years building experience including 5 years commercial and 7 years residential in both Wellington and Tauranga.

Daniel has been responsible for the majority of the villas at Tauranga Copper Crest Estate Village. "I have been extremely fortunate to have enjoyed a long business association with Bruce and Astrid. They are both really good people who are passionate about the Village they are creating" says Daniel.

Daniel is really impressed with the villas which are solid, well designed dwellings constructed with a plastered brick cladding. They range in size from single bedroom to substantial multi-bedroom residences with a high stud inside, higher than standard door height and excellent chattels. Not only are the villas a bullet proof design and attractive but they also reflect the individual design wishes of their owners on the inside.

Daniel is both hands on and manages the entire build efficiently which usually includes having up to 10 projects on the go at various stages of completion at any one time. This has allowed Daniel to train his team each step of the build from boxing the floors to the final last touches. Daniel really enjoys being able to pass these skills on to his team including his apprentice Cody Wilson who has been working with him for 3 years.

There will be at least 2 more years for the team at Copper Crest Estate Village. Daniel says "There is something really special about having such a long-term project as Copper Crest and I am very proud of my contribution to its development". It's been such a great experience and is a special part of his building journey. Daniel is also looking forward to the team expanding which will allow the company to start building larger-type residences outside of the Village as well.
